DETAILED ACTION

1. Claims 1 and 3-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims continue to indefinite and unclear in nature do to limitations that lack positive recitation, antecedent basis, and idiomatic form. The claims are method claims and as such should be set forth by way of active method steps to perform the desired operation and not in a narrative fashion. In claim 1, line 4, the limitation, "by sweeping a repetitive profile" is unclear and indefinite in nature; what makes for "sweeping"? On lines 13/14 of claim 1, "the two faces of the corrugation" lack antecedent basis. Further in claim 1, the recitations of "non-rectilinear region", "convex apexes", and "adjacent rectilinear region" have not been positively recited in the method and hence render the claims indefinite. In claim 3, "the convex apexes" lacks antecedent basis. In claim 6, "the regions" lacks clear antecedent basis.
2. Claims 1 and 3-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
3. Applicant's arguments filed 12/10/2004 have been fully considered but they are not persuasive. The pending claims continue to contain limitations that are indicative of direct translation and hence render the claims awkward, unclear, and indefinite. As recited supra the claims contain many limitations that lack antecedent basis and non-positive recitation. Further as method claims they should be drafted as active steps to perform the desired operation.

Art Unit: 3725
